Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 30 August 2007.
- 2a) ☐ This action is **FINAL**. 2b) ☐ This action is non-final.

DETAILED ACTION

Response to Amendment

1. This is in response to Applicant(s) arguments filed on 08/30/2007.

The following is the current status of claims:

Claim 33 has been canceled.

Claims 1-32 and 34-63 remain pending for examination.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-24, drawn to a computer-implemented method for generating page rankings using a user access log, comprising extracting implicit links from the user access log; generating an implicit links graph from the extracted implicit links; and computing page rankings using the implicit links graph; and displaying the page rankings to a user, classified in class 707, subclass 5.

- II. Claims 25-32 and 34-63, drawn to a computer-readable medium having computer-executable instructions for enhancing local searching of web sites and intranets by mining user access logs, comprising segmenting the user access log into different browsing sessions; generating ordered pairs of pages from the browsing sessions to find implicit links by using a gliding window to move over explicit paths of the browsing sessions to generate the ordered pairs of pages; constructing an implicit links graph from the implicit links; generating two-item sequential patterns from the

ordered pairs; updating the implicit links graph using the two-item sequential patterns; re-ranking search results obtained from a search engine to enhance the local searching to produce updated search results; and displaying the updated search results to a user, classified in class 709, subclass 217.

The inventions are distinct, each from the other because of the following reasons:

Invention listed Group I and Group II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in scope and are not obvious variants, and if it is shown that at least one subcombination is separately usable.

In the instant case, invention has separate utility as follow:

Group I Query refining.

Group II. Browsing or navigating

See MPEP § 806.05(d).

The examiner has required restriction between subcombinations usable together. Where applicant elects a subcombination and claims thereto are subsequently found allowable, any claim(s) depending from or otherwise requiring all the limitations of the allowable subcombination will be examined for patentability in accordance with 37 CFR 1.104. See MPEP § 821.04(a). Applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to

provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.

Because these inventions are distinct for the reasons give above and have acquired a separate status in the art as shown by their different classifications, restriction for examination purposes is proper.

Because these inventions are distinct for the reasons given above and the search for Group I is not required for Groups II and restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant(s) are reminded that upon the cancellation of claims to a non-elected invention the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors in no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
